

The Ideas Distillery

# GET THE GOLD STANDARD IN INFORMATION MANAGEMENT

And get  
ahead of the  
new General Data  
Protection  
Regulations

## Why should you consider ISO 27001?

Information is quite simply the lifeblood of your organisation and it is absolutely critical that its confidentiality, integrity and availability (CIA) is protected. Achieving certification to ISO 27001 demonstrates that not only is an organisation **complying with regulations**, and legislation, but it is aware of and takes seriously its responsibilities and, possibly most importantly, is **meeting the expectations of its customers**.

The Ideas Distillery helps organisations construct an ISO 27001 framework around which they can build a management system to protect one of their most important assets - **information**. Adopting a risk based approach, ISO 27001 enables organisations to select suitable and proportionate controls for information held electronically, on paper or other media.

It also ensures conformity to the new **General Data Protection Regulations (GDPR)** which came into force from May 2018, which includes encryption of data; risk assessment; business continuity; and testing. Prices vary with the size and complexity of the organisation.

## What The Ideas Distillery will do

We are an experienced consultancy specialising in ISO standards, and we will make sure that all the requirements of the ISO 27001 standard are met in a way that embraces any pre-existing practices and documentation. Our support includes:

- ✓ An information security policy, project plan, ISMS scope and objectives;
- ✓ A mandatory information security risk assessment;
- ✓ Development of all ISMS documentation;
- ✓ Recommendation of the required controls to be implemented based on the risk assessment outcomes;
- ✓ Fundamental security awareness training for staff;
- ✓ An internal ISMS audit before certification;
- ✓ Support during the certification audit; and
- ✓ Support selecting the right accredited certification body for you.
